Signature Technologies LTD

United Kingdom, signtechno.com

Programmer

The leading direction is the creation of web projects based on the customer's requirements and design.

The projects were completely completed by me, with the exception of the design. Each web project is implemented on its own CMS (ContentStreamer) using Apache, PHP, MySQL, and Javascript.

Additional responsibilities (participation in the company's parent projects):

- ActionScript;
- template Production (cutting and layout);
- Server support.

The company was engaged in outsourcing. The work was carried out in an international team (Serbia, India, China, great Britain, Hungary)
